INSTRUMENT STAND Model 1600-ST
FEATURES:

♦ INSTRUMENT CONSOLE
the console is equipped with three recharging wells and also features a raise/lower switch for chair control, rheostat for overhead light intensity control and main on/off switch.

♦ COUNTERBALANCED SLIT LAMP ARM
the lock/release mechanism is conveniently located under the slit lamp arm and allows height adjustment with single handed control. A 13” (33cm) range of travel from 24” (60.9cm) to 37” (93.9cm) from the floor and is counterbalanced to accommodate instruments up to 60 lbs (27.2kg). The switch controlling the chair’s height is conveniently located on the front of the arm for easy, effortless access (reversible for left handed setup).

♦ UPPER (REFRACTOR) ARM
an ergonomically designed lever mechanism conforms to natural hand movements and engages a single lock mechanism in three dimensions (forward/backward/vertical). The arm is capable of a vertical range of 12.5” (31.75cm) and is counterbalanced to accommodate instruments up to 20 lbs (9.1kg).

♦ HALOGEN OVERHEAD LIGHT
a modern overhead light is a standard feature on the Model 1600-ST and employs a long-lasting halogen lamp, providing bright, direct light for general lighting or minor procedures. A metal lamp arm construction allows one handed movement with long lasting durability. The lamp is low voltage (12V) for safety.

♦ THIRD ARM (OPTIONAL)
with the same ergonomically designed lever mechanism as the refractor arm, the optional third arm has a vertical range of 12.5” (31.75cm) and is counterbalanced to accommodate instruments up to 30 lbs (13.6kg).
